paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 264 Publisher: China Coal Mine Pub. Date :2009-12-01 version 1. Book a more systematic. comprehensive introduction to the common dynamic mechanical engineering electrical physical quantity measurement method. including mechanical engineering in the most widely used test vibration. force. temperature. noise. traffic and other parameters of the test principles and methods. as well as the parameters of the test closely related to the basic theoretical knowledge. sensors transform theory. the signal conditioning circuit. data analysis and processing techniques. and also introduced the modern test systems and experimental design and data processing and so on. This book can be used as colleges and universities of Mechanical Engineering and similar professional materials. also available in mechanical engineering test engineering officers. Contents: Introduction Chapter Overview Section describes the test signal and periodic signal with discrete spectrum Section III non-periodic signal with a continuous spectrum of random signals fourth chapter review questions to think the basic characteristics of measuring devices outlined in Section Section III measuring device measuring device static characteristics of the dynamic characteristics of the fourth quarter to achieve the conditions of Section V without distortion measuring device measuring the dynamic parameters of the measured effect of section VI of the load reflection review questions outlined in Chapter III Section commonly used sensor Section II parametric sensor fourth generation sensor other types of sensors used in section V of the principle of sensor thinking review questions Chapter signal conditioning signal amplification II Section III bridge modulation and demodulation Section IV Chapter V filter review thinking questions test signal processing digital signal processing section of the basic steps in Section IV AD converter Correlation Analysis Section V signal power spectrum analysis of...
